

COIL TUBING PRODUCTS

Ball Check Valve - 300 Series

The Coil Solutions Ball Check Valve is designed to provide a means of closing off back pressure from the Coil Tubing within the well.

The ball seals upon a seat creating a metal to metal seal that provides a pressure tight barrier in one direction, but enables flow in the opposite direction.

- Single or Tandem capability
- Comes in a variety of sizes and thread combinations
- Easy and fast redress
- Cost effective

*Note. All values are rated for STD material.

Tool OD (in)	1.250	1.5	1.687
Connections	3/4" AMMT	1" AMMT	1" AMMT
