

COIL TUBING PRODUCTS

Poppet Check Valve- 300 Series

The Coil Solutions Poppet Check Valve is designed to provide a means of closing off back pressure from the Coil Tubing within the well.

The Poppet Check Valve consists of a spring and poppet design. The spring pushes up on the poppet which creates a metal to metal seal providing a pressure tight barrier in one direction but enables flow in the opposite direction.

- Single or tandem capability
- Robust design
- Easy Fast Redress
- Cost Effective
- Wear resistant

*Note. All values are rated for STD material.

Tool OD (in)	1.250	1.5	1.688
Connections	¾" AMMT	1" AMMT	1" AMMT
Tensile Strength (lbs)	15,000	33,000	28,000
Torsional Strength (ft/lbs)	250	460	460
ID Flow(in)	.531	.750	.750
Single Length (in)	6.61	10.79	11.15
Working Pressure (psi)	8,500	8,500	8,500

*Other sizes and thread variations upon request.
